# **Install the Fixture**

- Secure the mounting plate to the junction box. 2 LIGHT VERSION: feed the fixture wires through the threaded nipple first.
- 2 Connect the fixture to a suitable ground in accordance with local electrical codes.
- 3 Connect the white fixture wire (square and/or rigid) to the neutral power line wire with a wire nut.
- 4 Connect the black fixture wire (round and/or smooth) to the hot power line wire with a wire nut.
- Neatly place all the wires into the junction box, place the fixture base onto the mounting studs/threaded nipple, and secure it in place using the cap nut(s).
- Screw the lamp into the socket. Refer to the label on the socket for Max Wattage Information.
- **7** For Wet Locations, caulk around the base of the fixture with waterproof construction sealant.
- **(Optional)**: Adjust the angle of the light by loosening the adjustment screw. Aim the light to the desired angle then tighten the adjustment screw.

(NOTE: The Lamp must be aimed down a minimum of 30° below horizontal.)
