

LED COURANT

LED Under Cabinet Light With Receptacles

The LED Courant is an easy-to-install, under cabinet task light with built-in 15A tamper resistant power receptacles. With a quick-access door to the wiring compartment and convenient push-in wire connectors, the LED Courant removes the visual clutter of in-wall receptacles while providing 90 CRI, 5CCT light selection.

- 5CCT selection (2700K, 3000K, 3500K, 4000K, 5000K)
- · Diffused lens eliminates dotting
- 15A tamper resistant receptacles built in
- · Multiple length options to fit any need
- Up to 2000 Lumens (40" model)
- · Low profile design less than 2" high
- · Direct wire installation
- Dimmable with most Triac and ELV dimmers (when wired on two separate circuits)
- · cETLus Listed for indoor dry locations
- 35,000 hours rated life

LED COURANT QUICK SPECS

VOLTAGE	120V AC			
WATTAGE	5W / 7.5W / 12W / 15W / 20W / 25W			
LUMENS	390-2000			
ССТ	5CCT Selectable - 2700K / 3000K / 3500K / 4000K / 5000K			
CRI	90			
DIMMING	5-100%* with most Triac/ELV dimmers			
BEAM ANGLE	1200			
CERTIFICATIONS	cETLus Listed - Indoor, Damp Locations; JA8 Certified			
RATED LIFE	35,000 hours			

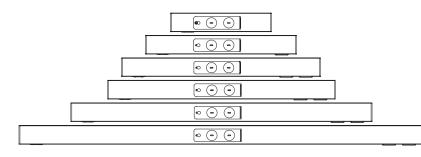

*This product is suitable for use in dimming circuits only when wired on two separate circuits (light fixture on dimming circuit & receptacles on GFCl circuit). It is compatible with most standard TRIAC, CL, and ELV dimmers (5-100% light control). When wired in combination (light and receptacle on the same circuit), do not connect fixture to any dimmer. Minimum loads may apply. Per the NEC, switched wall outlets cannot be used with wall dimmers.

LED COURANT WIRING INFORMATION

Combined Circuit (Light & Receptacles on Same Circuit)

- Not suitable for dimming
- Receptacles are auxiliary to NEC Code

Separate Circuits
(Light & Receptacles on 2 Independent Circuits)

- Suitable for dimming
- Receptacles count towards NEC Code Requirement

LIMITED PRODUCT WARRANTY

Our products are warranted to be free from defects in material and workmanship for the warranty period listed. Warranty periods begin from the date of shipment from American Lighting Inc's warehouse to the original purchaser. Products that prove to be defective during their specific warranty period will be either repaired or replaced, at the sole discretion of American Lighting Inc. Claims for defective products must be submitted in writing to American Lighting Inc's RGA Department within the warranty period. Upon approval of such return, American Lighting Inc reserves the right to inspect the product for misuse or abuse. Claims for indirect or consequential damages or for product that, in American Lighting Inc's opinion, has been misused will be denied. This is a warranty of product reliability only and not a warranty of merchantability or fitness for a particular purpose. American Lighting Inc shall have no liability whatsoever in any event for payment of incidental or consequential damages, including, without limitations, installation costs and/or damages for personal injury and/or property. These products may represent a possible shock or fire hazard if improperly installed or altered in any way. This warranty does not apply to any product that has not been properly installed in accordance with current local codes and/or the National Electrical Code. Products that require a transformer, driver, or power supply must be used in conjunction with American Lighting Inc's recommended power supply to ensure safety and retain product warranty.

PRODUCT SPECIFICATIONS

For the latest product information, updates, instructions and details concerning specifications, colors, finishes, performance, installation and design, visit www.americanlighting.com. Color may vary from the color printed herein due to limitations in photographic and printing processes. American Lighting Inc. reserves the right to change product specifications without notice. Other product specifications such as color temperature, wavelength characteristics and lumen output are subject to production limitations and may vary. LED technology is changing rapidly, and not all color temperatures and performance levels can be duplicated at a later time. Best practices include purchasing 10-15% more for a particular project on the same initial order where white LED color temperatures must be maintained over project and product life. Eventual product replacement should be considered at layout and design stages. Best practices also include testing connections and product performance prior to mounting and/or installing.

AVERAGE LIFE

Average incandescent lamp life, rated life and average life are terms used to describe the number of hours at which half of the lamps have failed. For LEDs, the hours of rated life specify the point where 70% of original lumen output is reached. Below this point, the effective life is over, however, the LED may still emit light. Individual results may vary with actual environmental conditions including, but not limited to, proper installation, ambient temperature and/or input voltage fluctuations.
